## SUCCESS STORY

### 5.5" ONEplug COMPOSITE FRAC PLUG

21260 Spell Cir, Tomball, TX 77375

---

#### ***ONEplug With Pump Down Fin, Significantly Improves Pump Down Rate & Deployment Times for West TX Customer.***

Lonestar Completion Tools had a win in West Texas, September 2024. We saw success by assisting one of our customers that was already running our 5.5" ONEplug Composite Frac Plug by implementing a pump down fin.

Without the pump down fin installed, we were averaging **550 ft. /min. at 22 BPM.**

Once the pump down fin was positioned, we were able to obtain **600 ft. /min. but at a much lower rate of 16 bpm.**

Given the opportunity, had we completed that entire job with the pump down fin, we estimated that we could have saved roughly 10,000 BBLS of fluid on that single well, while also saving substantial time of deployment.

Also of significance, our cost for a pump down fin is far more cost effective than that of our competitors.
