

**LONESTAR  
COMPLETION  
TOOLS**

## **SUCCESS STORY**

Lonestar Completion Tools' 4.00" FRIO  
Dissolvable Refrac Plug

21260 Spell Cir, Tomball, TX 77375

---

**We earned our customer's trust by rapidly designing and delivering a custom 4.00" dissolvable refrac plug to remedy their specific problem for this well.**

### **Job Well Information:**

- Casing: 4" 11.6# P110 Liner
- Measured Depth: Surface to 14,508
- Number of stages: 31
- Max treating pressure: 12,500 psi

### **Plug Performance**

- Average pump down speed: 575 ft/m
- No Presets
- Provided a quick and easy install for wireline
- No slips

### **Drill Out Performance**

- Immediately after the frac completion, coil tubing was rigged up, and downhole operations began within 24 hours.
- Two plugs were tagged on the clean out, max drill time was 5 minutes.

### **Key Takeaway:**

Our customer faced casing issues. They trusted that LCT could not only accommodate their needs quickly but that we could provide them with a custom frac plug to solve their problem.
