Shifting Perspectives on Dissolvable Plugs

21260 Spell Cir, Tomball, TX 77375

Success Story

A legacy company in the industry recently engaged LCT to run plugs in two, four-well pads in East Texas. As a company with a strong history in composite plug operations, we recommended a tailored solution to our customer: using both our ONEplug Composite plug and FRIO Dissolvable plug to optimize performance, considering the well's environment.

Initially hesitant, the customer trusted our guidance after reviewing our dissolvable run history and plug performance.

They were surprised by the huge success of running the dissolvable plugs which led them to fully adopt our dissolvable plugs for the remaining wells.

Industry Impact

In the past, the industry was hesitant to use dissolvable plugs due to concerns about their reliability.

However, through innovative redesigns, rigorous testing in challenging environments, and forward-thinking solutions, our advanced dissolvable plug technology has successfully overcome these limitations, providing a dependable and efficient alternative to bridge the gap.

Lonestar Completion Tools is proud to be at the forefront of developing dissolvable plugs that are not only reliable but also transformative for the industry.
